ABOUT ME

Computer Science graduate with internship experience in Full Stack Development and a published IEEE research paper in Artificial Intelligence. Passionate about building scalable applications, learning cloud technologies, and solving real-world problems through technology. A quick learner with strong problem-solving skills, eager to contribute and grow in a dynamic software engineering environment.

KEY SKILLS

Python	MongoDB
Java	AWS
JavaScript	Figma
SQL	Vercel
React.js	Render
Node.js	Railway
Express.js	Machine Learning
REST APIs	Data Analysis
NoSQL	Prompt Engineering
Git & GitHub	

CERTIFICATION

- **Research outcome published** in the **IEEE ICAECA 2025 conference**: Predicting Student Attention and Engagement Through Eye-Tracking Using Machine Learning. [Link](#)
- **IBM Full Stack Software Developer** Professional Certificate - Coursera
- **AWS Academy Graduate** - Data Engineering
- **Eye Tracking Fundamentals** - Coursera
- Merit Scholarship - Three Consecutive Years

EDUCATION

B.E., Computer Science & Engineering -
Kumaraguru College of Technology
(Jun 2022- Apr 2025) - CGPA: 8.01

Diploma, Computer Science -
Nanjiah Lingammal Polytechnic College
(Jun 2019 - Apr 2022) - Percentage: 96%

WORK EXPERIENCES

Software Development Intern at Adrasti Pvt. Ltd., Bengaluru

Dec 2025 - Present

- Developed and enhanced **10+ application features** across frontend and backend using **React, Node.js, Express, and MongoDB**.
- Built and integrated REST APIs, improving communication between frontend and backend services.
- Identified and **resolved 30+ software bugs**, improving application reliability and user experience.
- Collaborated with developers using **Git and participated in code reviews, testing, and deployment activities**.
- Optimized database queries and application logic, contributing to improved response times.

PROJECTS

Learning Behavior Prediction System Using Eye Tracking Python | OpenCV | Machine Learning

Built a machine learning system that **predicts student engagement by analyzing eye-movement and gaze patterns** during online learning sessions. Collected and preprocessed **eye-tracking datasets**, applying **computer vision** techniques for gaze detection, **feature extraction**, and **model evaluation**. Generated analytical insights to support personalized learning recommendations; **findings published as an IEEE ICAECA 2025 paper**. [Link](#)

AI-Powered E-Commerce Platform

React.js | Node.js | Express.js | MongoDB Atlas

Developed a scalable e-commerce platform with **customer, seller, and admin modules**, **role-based authentication**, and REST APIs for products, inventory, and orders. Integrated **MongoDB Atlas** plus an AI chatbot for customer support.
